

Product Requirement Document (PRD) - Digital Scrapbook

Field	Details
Feature Name	Digital Event Scrapbook
Status	Implemented
Target Audience	Checked-in Meetup Attendees & Community Admins
Author	Antigravity AI Code Assistant

1. Executive Summary & Objective

In community meetups, capturing memories and facilitating interactive networking is essential. The **Digital Event Scrapbook** allows checked-in attendees to upload photos, GIFs, and short videos directly to a shared event gallery during a designated upload window. It enables community members to share their perspectives, preserves memories, and serves as an interactive memory wall.

2. User Personas & Use Cases

A. The Attendee (Uploader/Viewer)

- **Objective:** Wants to capture and share event moments, view photos/videos uploaded by peers, and revisit the scrapbook after the event.
- **Requirements:**
 - Secure drag-and-drop file upload.
 - Optional captioning to describe the media.
 - Video playbacks on hover.
 - Access to full-screen slideshow/preview views.

B. The Community Organizer / Admin (Moderator)

- **Objective:** Needs full control over the scrapbook content to ensure community safety, and manage the event timeline.
- **Requirements:**
 - Set and toggle the upload close window.
 - Moderate items (mark as `kept` or `removed`).
 - Permanently hard-delete items, removing their files from the server's disk space.

3. Functional Requirements

A. Upload Window Control (Admin Only)

- Admins can specify a datetime (`upload_close_at`) using a custom dashboard control.
- If no close date is configured, the upload window defaults to closed.
- Real-time countdown clock displays the hours, minutes, and seconds remaining for uploads.
- Clear indicators: "Open for Uploads" (with pulsing light indicator), "Closing Soon" (under 2 hours), and "Upload Closed".

B. Media Upload Constraints

- Only **checked-in attendees** (or administrators) can upload media.
- Supported mime-types:
 - **Images:** JPEG, PNG, GIF, WebP
 - **Videos:** MP4, WebM, MOV
- Maximum file size: **50 MB** (to support high-resolution pictures and short video clips).
- Best-effort server cleanup deletes invalid or rejected files from disk.

C. Aesthetic Curation & Gallery Layout

- Beautiful **Masonry-style photo/video grid** displaying all shared memories.
- Media hover animations:
 - Text caption overlays containing the uploader's name.
 - Videos auto-play in muted loop on hover, resetting to the start on mouse exit.
- Fullscreen preview overlay for all files:
 - Plays video clips with audio controls.
 - Displays high-resolution photos.
 - Esc key keyboard support to close preview.

D. Admin Moderation & Curation Actions

- Inline moderation buttons visible *only to admins* on hover over media tiles:
 - **Check (Keep):** Explicitly marks the post as curated (**kept**).
 - **Trash (Remove):** Hides the post from normal attendees (**removed**).
 - **Delete (Hard Delete):** Removes the database entry and deletes the physical file from the disk.
 - Non-admin attendees cannot see items marked as **removed** .
-

4. Technical Architecture

A. Database Schema

```
CREATE TABLE IF NOT EXISTS scrapbook_settings (  
  id            INTEGER PRIMARY KEY AUTOINCREMENT,  
  meetup_id     INTEGER NOT NULL UNIQUE,  
  upload_close_at TEXT,  
  enabled       INTEGER NOT NULL DEFAULT 1,  
  FOREIGN KEY (meetup_id) REFERENCES meetups(id)  
);  
  
CREATE TABLE IF NOT EXISTS scrapbook_items (  
  id            INTEGER PRIMARY KEY AUTOINCREMENT,  
  meetup_id     INTEGER NOT NULL,  
  uploader_id   INTEGER NOT NULL,  
  file_path     TEXT NOT NULL,  
  media_type    TEXT NOT NULL DEFAULT 'photo',  
  caption       TEXT,  
  status        TEXT NOT NULL DEFAULT 'pending',  
  uploaded_at   DATETIME DEFAULT CURRENT_TIMESTAMP,  
  FOREIGN KEY (meetup_id) REFERENCES meetups(id),  
  FOREIGN KEY (uploader_id) REFERENCES users(id)  
);
```

B. API Reference

Method	Endpoint	Auth	Description
GET	<code>/api/scrapbook/:meetupId</code>	Checked-in User	Fetches gallery items, window state, and settings
POST	<code>/api/scrapbook/:meetupId/upload</code>	Checked-in User	Uploads media file + caption (Max 50MB)
PATCH	<code>/api/scrapbook/:meetupId/items/:itemId</code>	Admin	Set status (<code>pending</code> <code>kept</code> <code>removed</code>)
DELETE	<code>/api/scrapbook/:meetupId/items/:itemId</code>	Admin	Hard-deletes file from DB and filesystem
GET	<code>/api/scrapbook/:meetupId/settings</code>	Admin	Retrieves specific scrapbook configs
PUT	<code>/api/scrapbook/:meetupId/settings</code>	Admin	Updates close timestamp & enable toggle
